

Anwar ul haq

Senior Software Engineer - Microsoft

Software Engineer with 8 years of experience building cloud-native, distributed backend systems on Azure. Specialized in platform engineering, orchestration services, and enterprise infrastructure used by large-scale clients. Proactive and goal-oriented professional with excellent time management and problem-solving skills. Known for reliability and adaptability, with swift capacity to learn and apply new skills. Committed to leveraging these qualities to drive team success and contribute to organizational growth.

Work Experience

Microsoft: Senior Software Engineer 2

Aug 2022 - Present

- Led the migration of Windows driver signing workflows to a centralized Azure-based signing platform, processing submissions from leading OEMs and IHVs including Intel, AMD, NVIDIA, Dell, HP, and Qualcomm, improving platform reliability, scalability, and operational control
- Built automated shadow-validation and regression-detection systems that enabled safe rollout of mission-critical signing infrastructure
- Designed and implemented an AI-powered agent to auto-triage driver submission requests and generate summaries in Azure Workbooks, reducing manual investigation time by several hours per request.
- Mentored engineers and drove technical planning, design reviews, and execution of strategic platform initiatives.
- Built an end-to-end automated test suite covering driver signing and publishing workflows, validating production deployment artifacts prior to release and providing high confidence in feature deployments with minimal regression risk.

Goldman Sachs: Software Engineer

Apr 2021 - Aug 2022

- Designed and built a PXE-based provisioning service delivering BootAction and DHCP templates, enabling automated bootstrapping of thousands of hosts and eliminating manual provisioning steps
- Developed a Work Order Service that facilitates the addition and updating of catalogs within the Xpedite system, overseeing their complete lifecycle from creation to removal. Additionally, it serves as a proxy, allowing third-party services to engage with our internal systems.
- Built an orchestration service to automatically onboard newly provisioned hosts into the capacity pool, managing full host lifecycle and improving provisioning reliability while eliminating manual intervention.

Traveloka: Software Engineer

Aug 2019- Mar 2021

- Built a microservices-based competitive intelligence platform on AWS ingesting real-time and scheduled pricing data from multiple competitors, enabling near real-time analytics and supporting downstream data warehouse pipelines.
- Developed a serverless platform with AWS Lambda to extract real-time competitor information for flight bookings.

Milvik: Software Engineer

Jun 2018 - Aug 2019

- Created a cross-platform desktop application for an insurance platform using JavaScript, Java, ReactJS, Redux, and ElectronJS.
- Collaborated with architects on design and development.
- Led a team of frontend engineers to deliver the product.

- <https://www.linkedin.com/in/anwar-ul-haq/>

Skills

- Java
- C#, Dotnet
- Javascript / Reactjs
- Azure
- AI Systems (RAG, Sementic Kernel)
- CI/CD
- Microservices
- System Design
- Redis
- SQL
- PostgreSQL
- CosmosDb
- Containerization

Certification

- Certified Azure Fundamentals

Accomplishments

Won a Microsoft hackathon by building an AI-powered Teams bot that autonomously joins meetings, answers real-time queries, and integrates with Azure DevOps for work item creation

Education

B.Tech: Computer science and technology

CGPA: 8/10
